**Session 1**

1330 Welcome

1340-1410 Adenine model of chronic kidney disease
Glenda Gobe

1410-1440 Streptozocin-induced Diabetic Nephropathy in eNOS KO mice
Usha Panchapakesan

1440-1510 Techniques for analysing kidney fibrosis
Chrisan Samuel

1510-1530 Afternoon Tea

**Session 2**

1530-1600 Role of mitochondrial dysfunction in kidney disease
Melinda Coughlan

| 1100-1115 | Young Investigator Award | Royal Theatre  
   Chair: Toby Coates                          |
|           | Impact of ischemic time on live-donor kidney transplantation: Graft and patient outcomes  
   Anoushka Krishnan                           |
| 1115-1130 | HMGB1 A box attenuates diabetic kidney injury in mice  
   Xiaochen Chen                              |
| 1130-1145 | Relative benefits and costs of an acceptable HLA mismatch program in Australia  
   Hung Do Nguyen                             |
| 1145-1200 | Complement acting through the C5a receptor mediates anti-myeloperoxidase auto-immunity and glomerulonephritis  
   Jonathan Dick                             |
| 1200-1215 | Effects of a three year lifestyle intervention on cardiorespiratory fitness and exercise capacity in patients with chronic kidney disease  
   Kassia Beetham                            |
| 1215-1230 | Human amniotic epithelial derived stem cells attenuate anti-myeloperoxidase glomerulonephritis  
   Andrea Godfrey                             |
| 1230-1245 | The relative preferences of recipients for outcomes after kidney transplantation: A best-worst scaling survey  
   Martin Howell                             |
| 1245-1300 | BANK1: A critical genetic determinant of B-cell systemic lupus erythematosus  
   Simon Jiang                              |
